

PREAMPLIFIER PHOTOMETER BOARD– Part No. A46001240

Preamplifier Photometer Board used in Colorimetric Analyzers

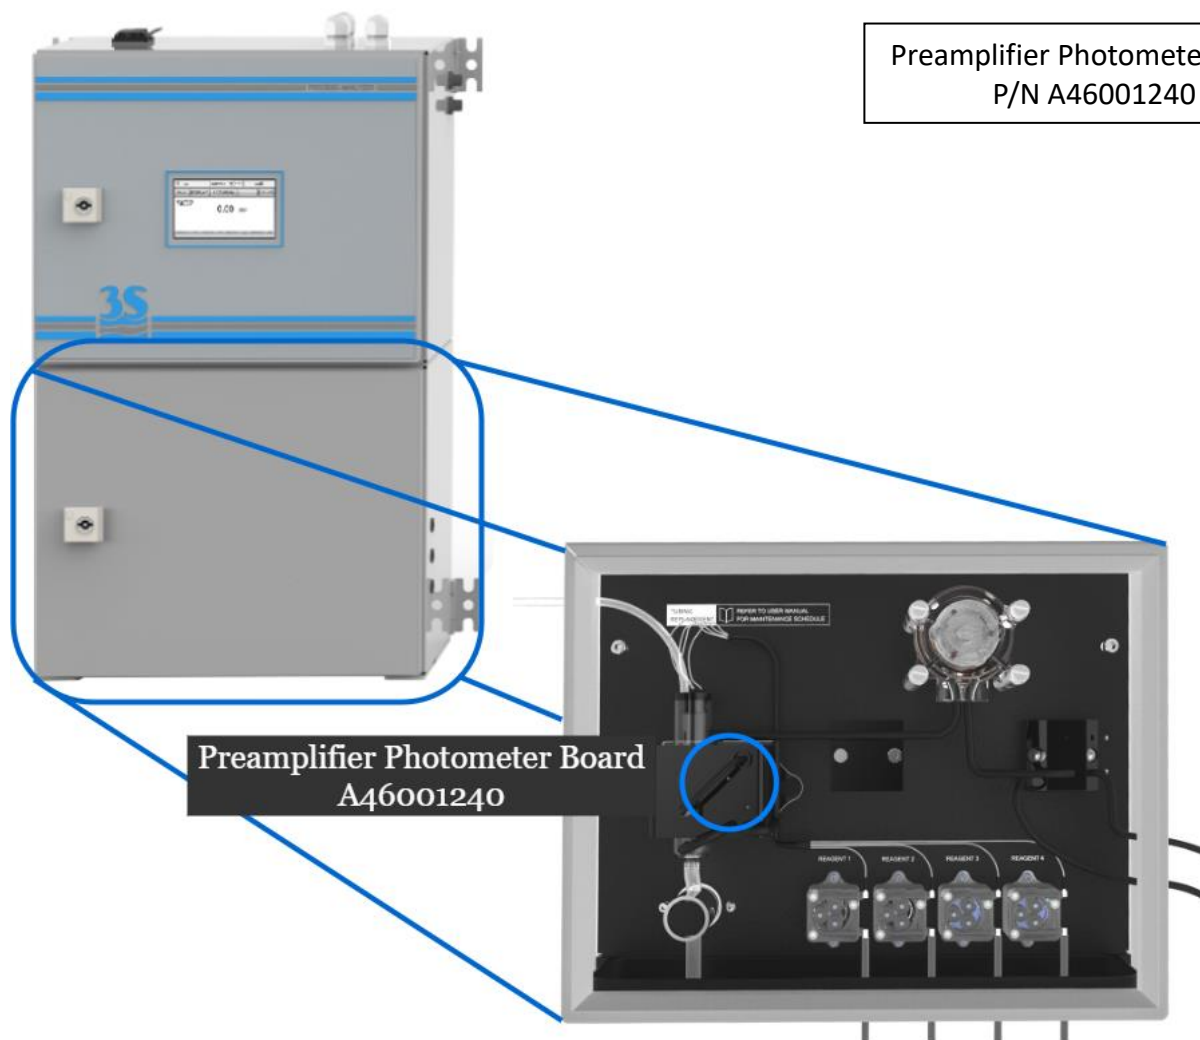

DESCRIPTION:

The Preamplifier Photometer Board is a replacement/spare part for the colorimetric analyzers. This item is positioned inside of the reaction block as shown below.

The Preamplifier Photometer Board is located on the opposite side of the LED light source. Photometer Board absorbs the light transmitted from the LED light source that goes through the sample and converts the absorbed light energy to an electrical current
